You can use this very easy software to change the id3-Tag of a MP3 file with KEYMACRO. What do you need? KEYMACRO needs a mp3 and a text file, where you can put a word or phrase as Key. If this file is not found, the file will be renamed to the original name. You can put up to 10 (very easy to change this to any number you want) words to the text file. You can change up to 10 (very easy to change this to any number you want) mp3-files. Syntax: Renatager mp3.mp3 renamer.txt Key1

Key2 Key3 Key4 Key5 Key6 Key7
Key8 Key9 Key10 How does it work?
First of all, it removes the spaces in the
mp3-file, and replaces it with the
spaces in the renamer.txt file. Then it
opens the renamer.txt file and removes
all of the spaces in the file. Finally it
writes the new Id3 tag to the new file.
What can be done with it? For example:
You have a folder which contains a few
mp3-files with spaces in the names.
Now with the tool, you can change the
Id3-Tag of those files to something you
want. Or if you have a folder with lots
of files with spaces in the names, you
can rename all of those files with one
click. No comments: [Post a Comment](#)

This simple renamer will allow to change the name of your mp3-files to fit to the world of ID3-Tag-music-files. This tool is the result of an attempt to deal with MP3-files and ID3-Tags. MP3-files are good for you? Then you will need this program. It is necessary to remove the leading 'cd'-space from the filename. Do not attempt to change the tags manually or in an automated way! The MP3 file-structure does not allow easy and correct access to the tags! The structure of the tags: The content of the tags: Conversion Features Optionnal (preferences) It is a

simple and powerful tool. It is enough that you use the button 'Tag'. It will automatically rename all the files on your harddisk. If you want to change the result, change the Filter-field to a file, the name, and the direction. When the renaming finished, you will have a clean ortophan folder containing the old mp3s. Some possibilites: You can choose to overwrite the old files, to choose another folder, or to use your harddisk as a backup. There are two tools to edit the tags: It is easy to create new tags and edit existing ones. Just check the 'Add' or 'Edit' buttons. The 'Undo'-button will re-use the old result. The 'Format' button will force the

renaming to standard html tags. You can choose to write a txt file with the filename, the new name and the path of the old mp3. It is possible to delete the underscores from the name of the mp3s. It is possible to choose the encoding to be used (UTF-8). The 'Sort-on' and 'sort-off' buttons will change the order of the files (the first by name, the second by the old name) The 'Filter'-field will show only the files you have selected. Many settings are stored in a file. To reset them, just delete the file 'Mp3renatager.xml' in your Mp3 folder.
