"We are going to announce it first, but we do plan on giving feedback on it with regards to changes. And then at the end of the year we will announce a release date and a price. But we want to make sure we get all the feedback out there on all the features, get them in there before the game is released, otherwise we're just gonna rush things out the door and people are gonna be like 'is that all I am?' If I am the Queen of the Indies, it's gonna have all the changes they want in it, and then if there are features they didn't like, we'll add them later." IGN: Are you saying the game won't be in Early Access forever? "We haven't made any decision regarding that, I just wanted to get the information out there." What's new:

Requires PC download of Morrowind, the Shadows of the Enclave expansion, and an internet connection. DRM: SteamMy cat randomly jumped on my back and started biting me. It's not the first time he's done it, but never bit hard. Anyways, now he's just jumping on me. I've scratched him and he's still doing it. I'm wondering if he bit me in a bad place. He's also being more aggressive in his eats and playing alot of tug-of-war. He's my 21 mos. old, American Shorthair. He started getting firmer and firmer last Friday, so I immediately brought him to the vet. I'm really afraid it's something more than it is because he hadn't been doing this since he was a kitten. Do you think he has rabies? I really don't want to give him something like that. Please help!!! Ravious 03-29-2007 12:51 PM My cat randomly jumped on my back and started biting me.
