In a rare bit of clarity on China's trade war, Trump's National Economic Council Director Larry Kudlow said on Sunday that the U.S. has a "pen in hand" in response to escalating trade threats from Beijing. "We do have a pen in hand," Kudlow told ABC's "This Week." "If we start to get very bad news on trade talks, we'll go over the line — we've indicated we're ready to do that." ADVERTISEMENT Kudlow's comments come as experts around the world warn that a trade war could easily rip through the world's largest economy. "There's no reason to think that they have a trade deal with the U.S. in mind," Kudlow said. "There's no reason to think that they have a trade deal in mind." The United States and China are currently engaged in a trade dispute that has seen the Trump administration slap tariffs on \$250 billion in Chinese goods. The administration has threatened to expand the duties to cover nearly all Chinese imports into the United States. Kudlow on Sunday warned of "brinkmanship" in trade talks, saying that if Beijing insists on imposing tariffs on U.S. goods, the administration will not hesitate to respond with equally large tariffs. "It's a game of chicken," Kudlow said. "I can understand why they're doing it. But we have a lot of domestic manufacturing, agricultural production in this country that depends on low tariff barriers. "As for me, and I'm not a tariff guy. I don't care about tariffs... if you can't make a deal and if you're going to be mean... you can have a very good shot at that," he added.Q: Magento 2: saving customer information after login I have a form in my admin for registering new customers. I need the data to be saved so it can be used when the user re-authenticates and so on. I was looking for a solution like a plugin or magento watcher that can be used to save the data. I could not find anything so I'm using an observer that runs right after the login and after a period of inactivity (say 10 minutes) and saves the info to the database. Do you know of a different and cleaner solution? A: this worked for me:

Q: Convert Bitfield to byte I've created a byte array which contains the data I got from a SQL Server database. The data is of type BIT. I need to convert this to byte because I need to send it over an RS232 connection. Is there a simple way to do this? The data is stored in a byte[3] and looks like this: 15...66 (64) 9..77 (65) 52..05 (68) A: Since your data is already in the byte array you just need to convert a single byte to 8 bits. `byte b = ...; // `b` is now the value in bits 15 (lsb), 54 (msb), 65 (lsb), 66 (msb), // 68 (lsb), 69 (msb), 70 (lsb) and 71 (msb) for (int i = 0; i > 4); // `b` now has the value in bits 18 (lsb), 55 (msb), 67 (lsb), // 68 (msb), 69 (lsb), 70 (msb) and 71 (lsb) }` Of course, if you want to have it in a byte array you can do that very easily in one line: `var bytes = new byte[] { 15, 66, 9, 77, 52, 0, 5, 68 };`
